QUILTED WALL PANELS

TITAN STAINLESS wall panels are made from 201 series stainless steel to ensure protection from moisture. Longer lengths are provided with “T” strips at each joint, to cover and trim the gap between each sheet of metal. The grain of the metal will be run vertically on taller wall panels (see below for further sizing information). Quilted panels are creased in a “cross” pattern, creating the diamond shapes.

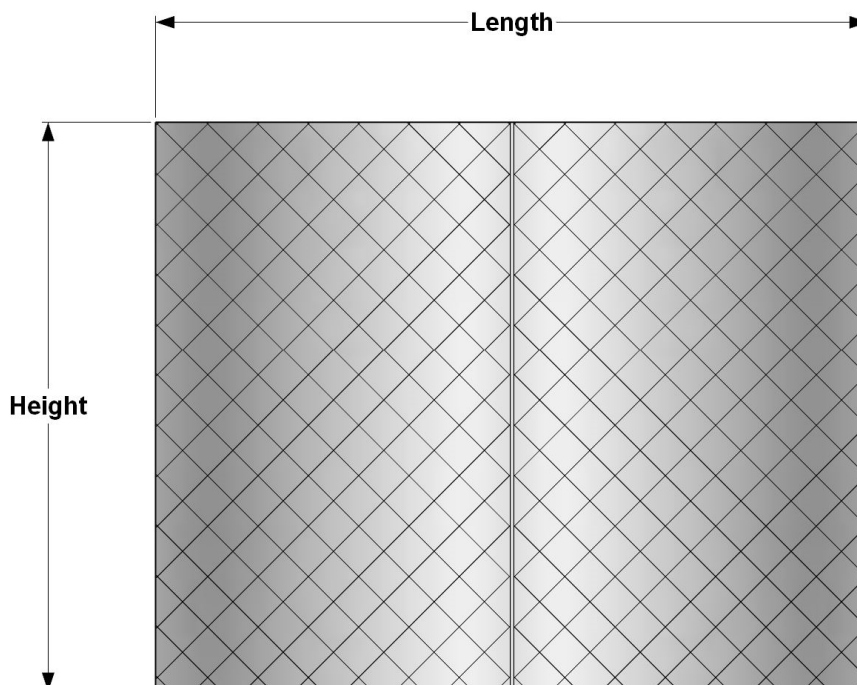

MODEL NUMBER SELECTION / INFORMATION

Model #: QWP-24

Wall panels are cut to length for each project, meaning they do not have conventional “standard sizes”. For full-sized wall panels, dimensions for the *walls that the panels will be covering* must be provided for proper fit (these are generally around 8 feet tall, or as specified). Alternatively, smaller panels can be cut to any size desired.

- See **AutoQuotes™** for full list of model numbers and pricing, along with all additional accessories
- Custom sizes and configurations are available upon request
