Notes & Details

When using the Hakka Brothers Commercial Countertop Bakery Display Case with Warmer System, ensure that the unit is placed on a stable, flat surface to maintain optimal performance and safety. The tempered glass and stainless steel materials are durable, but avoid using abrasive cleaners that could damage the surfaces. The warmer system is designed to maintain the perfect temperature for your baked goods, but always monitor the temperature to prevent overheating or underheating. For best results, regularly clean the case and check the electrical components for proper functioning. This display case is ideal for use in dry, well-ventilated areas and should not be exposed to excessive humidity or extreme temperatures. Additionally, always follow the manufacturer's guidelines for setup and maintenance to ensure the longevity and efficiency of the unit.
