Product Description:

The Empura E-MCF350 Modular Ice Machine is a compact yet powerful unit, producing up to 350 pounds of full-cube ice daily. Designed with a durable stainless steel exterior and ABS plastic interior, it offers robust performance and reliability. Operating quietly at under 70 dB, it's energy-efficient with R290 refrigerant and uses just 12.3 gallons of water per 100 pounds of ice. With a compact footprint and ETL certifications, this air-cooled modular unit is an excellent choice for businesses needing high-capacity ice production without compromising on efficiency or quality.

Intended For Commercial Use Only. Empura assumes no liability for component failure, factory defects or any other damages for units installed in non-commercial foodservice or residential applications.

About Empura Modular Ice Machines:

The Empura E-MCF and E-MCH Modular Ice Machines are high-performance units designed for businesses with large-scale ice production needs. With durable stainless steel construction, eco-friendly refrigerants, and energy-efficient operation, these ice machines deliver robust daily ice yields. Pair them with compatible storage bins for a customizable solution tailored to your business's demands. Perfect for restaurants, bars, and other commercial spaces, Empura modular ice machines are built to keep up with the busiest environments.
