VENT DUCT

TITAN STAINLESS vent ducts are made using all-welded 18 gauge stainless steel construction. 201 series stainless is used to ensure protection from moisture. The ducts are sized to fit inside the vent stacks on a standard commercial dish machine's vent cowl. (Dish machine is shown in the illustration below for reference only.) Adjustable trim "collars" are provided to conceal the cutouts in the ceiling.

MODEL NUMBER SELECTION / INFORMATION

Model #: VD

Vent ducts are made to length for each project, meaning they do not have conventional "standard sizes". The make and model of the dish machine must be provided, along with the finished ceiling height of the dish room, for proper fit.

- See **AutoQuotes™** for full list of model numbers and pricing, along with all additional accessories
- Custom sizes and configurations are available upon request
