

MARSHALL

ThermoGlo™

Model AP8 Series

Dump Station Heater

Item No: _____

AIA FILE NO./ SPEC NO.

CONSULTANT/ CONTRACTOR APPROVAL

Marshall's AP8 & AP8B Dump Station Heaters incorporate ThermoGlo™ technology designed to solve demanding warming and holding temperature requirements.

FEATURES:

- Delivers a wide range of temperature capabilities to fill exact warming and holding requirements.
- Flat surface allows for easy wipe-clean maintenance.
- Food stays "presentation ready" longer because exact internal temperatures can be reached faster and maintained longer.

The Marshall **Model AP8 Series** Dump Station Heater features our ThermoGlo™ heating technology. Heat radiates from every square inch of the upper flat plate heating surface. This eliminates the need to clean intricate calrod, wire and reflector assemblies.

This unit is designed to mount on virtually any fryer manufacturer's dump station, including AP8 for gas or AP8B for electric profiles. French fries, onion rings and hush puppies and more are ideal food products for this technology.

All Marshall products are supported by a nationwide service organization and in-house full-time Customer Service Department. To place an order call:

1-800-627-8368

CONSTRUCTION:

- Heavy gauge stainless steel
- Designed and built to custom specifications with heat radiating from the ThermoGlo™ surface
- Designed with a flat unbreakable radiating metal face encased in stainless steel housing

**ETL (US and Canada) & NSF Listed
FOR COMMERCIAL USE ONLY**
