## Easy Tuna Press

Just a few turns and a few seconds—that's all you need to remove the excess water from your canned tuna.

Buy once. Buy the original.  
Always look for this mark of quality

# Performance Under Pressure

When it comes to preparing incredible tuna salads, sandwiches and more, don't sacrifice quality for speed—or vice versa. Put the squeeze on with the Nemco Easy Tuna Press. It works quickly to remove excess water, yet works consistently to retain the right moisture.

## Easy Concept. Even Easier to Use.

The Tuna Press installs almost literally in a snap. Then, its drill-press style action takes minimal effort on the part of the operator and multiplies it into heavy-duty pressure on the tuna.

1. Hang the press on the side of your kitchen sink.
2. Open the tuna can, and pour out the water.
3. Keeping the can's lid in place, invert the can face down on the Tuna Press base.
4. Turn the crank a few times until snug.

## Never Lets Up

Simply designed, with no over-engineering, the Tuna Press puts all the pressure where it belongs—relentlessly for years of performance.

- The press perfectly fits the surface area of a commercial tuna can and, when actuated, evenly distributes force onto the product for a uniform water extraction.
- Constructed of cast aluminum and stainless steel for exceptional durability.
- For cleaning or storage, it lifts off the sink as easily as it goes on.

## Suggested Uses

*When salads, sandwiches and other chunk-tuna favorites are on the menu—and soggy bread and lettuce are not—this is the labor-saving tool to have on hand.*

## General Specifications

Model	Description
55800	Tuna Press

### Dimensions

Equipment (w x d x h)	6" x 12" x 22"
Shipping carton (l x w x h)	13½" x 7" x 21"
Equipment Weight	9 lbs
Shipping Weight	12 lbs

*Replacement parts are available through Nemco's 24-hour Zip Program.*

*Nemco reserves the right to make design, specification or model changes without notice.*

*Stainless-steel handle takes little effort to apply serious pressure*
