Specifications

CH-ADA Model Grating is constructed of fiberglass, with molded "micro-mesh" squares & an SGF Polyester Resin.

The grating consists of a $\frac{3}{4}$ " square mesh opening on the top surface & a $1\frac{1}{2}$ " square mesh opening on the bottom surface. The standard grating depth is 1".

The panels with a $\frac{1}{2}$ " open area between bearing bars are ADA compliant & meet the "15 mm ball test."

The # of bars/ft of width is 8. Standard load bar width is $\frac{1}{4}$ ". Load bar centers are rated at $1\frac{1}{2}$ ".

The grating features a 44.4% open area & the approximate weight is 2.9 lb per sq. ft.

Grating size is not to exceed 20" long sections.

Product Guide

CH-ADA Chemgrate Grating is an ideal substitute for steel or aluminum gratings. Long life, inherent in fiberglass (often outlasts steel 20-to-1), makes CH-ADA a problem solving material where frequent replacement costs are unacceptable.

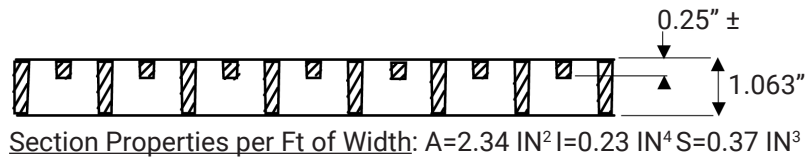

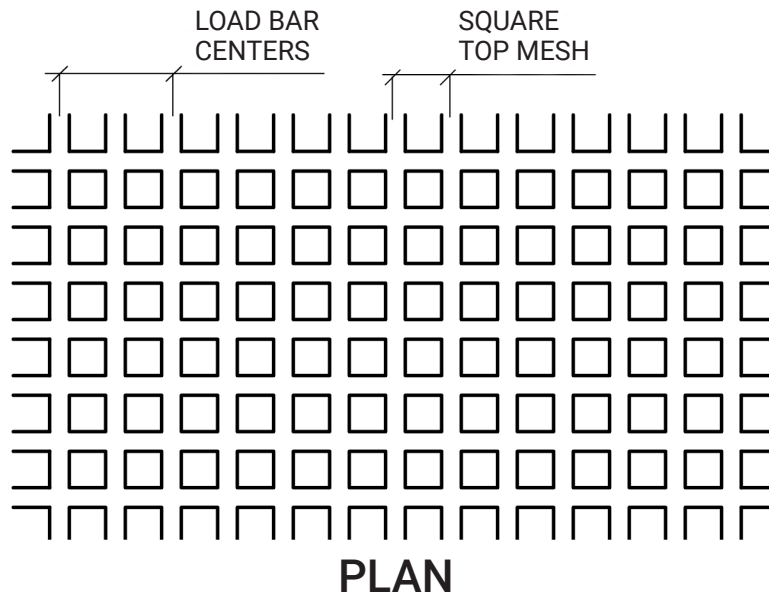

Fiberglass Gratings are corrosion resistant, structurally strong, fire retardant, lightweight, anti-slip surface & low maintenance.

Options

- ☐ Custom Sizes
- ☐ Change Color to Yellow/Green (Same Price as Gray)
- ☐ Uniform Cut (Closed Ends) - modifies trough dimensions to custom fabricated units
