MERRYCHEF®

GENUINE MERRYCHEF ACCESSORY

Oven mounting plinth

Merrychef conneX oven mounting plinth

Article number:
PSY158
(compatible with conneX®12, conneX®12e and eikon® e1s)

Article number:
PSF158
(compatible with conneX®16)

Features:

The oven mounting plinth provides a stable base for a single Merrychef oven, raising it slightly above the work surface. It offers convenient storage for paddles and other accessories, helping to keep the counter organised and essential items close at hand.

Manufactured from stainless steel for a durable, professional finish, the plinth requires no assembly. A removable tray at the base allows easy access for routine cleaning.

The plinth is approved for use with a single oven only. It must not be used to stack two ovens or as a general-purpose shelving.

Options:

For single oven stacking only.

The eikon® e1s and conneX® 12e can be used with the PSY158 plinth. However, they will not sit flush because the dimensions of the ovens and plinth differ.

Recommended application:

Ideal for making efficient use of limited counter space. Storing the oven paddle beneath the oven keeps it organised and close at hand, providing convenient, ergonomic access during everyday operation.

Install and cleaning:

The plinth requires no assembly, but two people are needed to install and position the oven onto the plinth.

Accessories:

The removable tray at the base of the plinth is also available to order separately.

Part No DY0148 for conneX 12 oven mounting plinth PSY158.

Part No DF0148 for conneX 16 oven mounting plinth PSF158.
