DUAL TEMP

Drop-In Hot/Cold Food Wells

Model

E-DT-1

E-DT-2

E-DT-3

E-DT-4

E-DT-5

E-DT-6

STANDARD FEATURES

- 3" recessed top edge to comply with NSF-7 requirements
- Single control for changing from hot to cold operation
- Easy access temperature & function control panel attached to a 24" long flexible conduit for optional counter mounting
- Self contained drop-in design
- Hold standard 12" by 20" food pans and fractional sized pans
- Stainless steel top and liner for maximum strength and durability
- 1" drains for ease of cleaning
- Type 134A or 404A CFC free refrigerant
- Fully insulated, CFC free, foamed-in place insulation keeps food cold while saving energy
- Recessed ledge for pan support and colder, fresher products
- Quick & easy service with sight glass, service valves, filter/dryer and receiver

DESCRIPTION

Dual Temperature Hot & Refrigerated Drop-In Cold Pans are two units in one; from a heated Bain Marie to a refrigerated cold pan with the flip of a switch. All models are completely self-contained in one to six-well models are CFC free and are recessed 3" to comply with NSF-7 performance requirements.

SPECIFICATIONS

Exterior – One-piece top flange and coved-corner interiors constructed of 18 gauge stainless steel. Exterior body constructed of heavy gauge, corrosion resistant steel. Condensing unit mounted on corrosion resistant frame below the cold pan.

Interior – CFC free foamed-in-place insulation through-out, 1" drain located in the center for easy cleaning. Ledge is recessed 3" to comply with NSF-7 requirements, allowing a layer of air to insulate food and for pan support.

Refrigeration – Air cooled, type 134A or 404A CFC free refrigerant system featuring wrapped coil construction on both sides and bottom, individual thermostats, and on/off switch. Refrigeration system features sight glass, easy service valves, dryer/filter and receiver.

Heating - Automatic water-fill with high-limit protection featuring a water sensor and solenoid valve to maintain proper water levels. And efficient electric immersion heating system transfers heat directly to the water while a positive-off thermostat controls provides adjustable and consistent temperatures. Designed for wet operation only.
