

CAN STORAGE

Take 10® Can Storage System

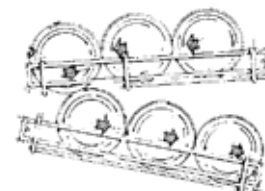

This unique No. 10 can storage system uses a two-tier gravity feed for FIFO stock rotation.

Expertly designed so that as each can is loaded onto the upper tier it rolls back and gently drops down to the lower tier and rolls to the front of the system for easy access. No need to push cans uphill and also ensures that older cans are always at the front.

- Each can storage module holds 5 cases (30 each of No. 10 cans)
- One module can be stacked on another or they can be stacked on existing shelving (accommodates all brands of shelving that is at least 18" deep and 42" long). Do not stack more than two modules high on any shelf
- Complete units can be purchased if required
- Units can be used under a worktable to provide a mini pantry in the kitchen
