Quantity: _____

Specifications

WFT Wall Flashing are made of 18GA or 20GA type 300 series stainless steel.

Can be custom cut to any width or height as needed.

Divider strips are included.

Product Guide

IMC Wall Flashing offer a way to direct water flow away from the facility in the case of a water leakage.

They can also reduce indoor mold that can occur from leaking water.

IMC Wall Flashing is polished to a #4 brushed satin finish so it will look attractive in any setting.
