StayFlat® Sheet Pans

StayFlat® Sheet Pans feature sidewalls that are continuously reinforced with a horizontal engineered rib. This feature increases sidewall strength up to 30% and provides an easy visual identification reference for situations where stronger, flatter sheet pans are required, such as for transport or for baking pies and cakes.

As part of our commitment to continuous improvement, throughout 2017 we upgraded several of our standard sheet pans to the StayFlat® design. (StayFlat® U.S. Patent No. 9,737,171)
