Maximum opening required for installation: 31" * Handle adds 2.5"(6.4cm) to depth	

Adjustable Legs

## Durable Construction

The CW41/CW61P is built with *prime 20-gauge cold-rolled top and sides* with a 14-gauge base. The *interior is made of Armco Type 1, 20-gauge aluminized steel*. The CW41/CW61P comes standard with stainless steel front, or optional all stainless steel finish. The stainless steel is made of high quality, 18-gauge 430 stainless; the door interior is 18 gauge stainless.

## Energy Efficiency

The CW41/CW61P features our *new energy-saving "Power-Pak" 4-cell burner system* and our *unique baffle system*. These make our ovens highly efficient and eliminate hot spots. The *heavily insulated walls*, coupled with our *special vent system*, reduces heat loss and keep your gas dollars from going up the stack. The CW41/CW61P is powered by two (2) 60,000 highly efficient BTU burners which *increase its efficiency and recovery rate*.

## Capacity

*The CW41P deck size measures 42"x32"x7"*. Actual cooking capacity depends on the size of the pizza you are cooking. The CW41P will hold six (6) 12" pizzas or four (4) 16" pizzas. Cooking time will vary according to product, but will average between 8-10 minutes.

*The CW61P deck size measures 42"x32"x7"*. Actual cooking capacity depends on the size of the pizza you are cooking. The CW61P will hold twelve (12) 12" pizzas or eight (8) 16" pizzas. Cooking time will vary according to product, but will average between 8-10 minutes.

## Space Saver

Because the controls are under the door, the CW41/CW61P requires *less installation space* than our competition. This enables you to free up valuable kitchen and/or hood space. The actual width needed is mere 50" for three (3) 42"x32" decks, almost a foot less than the competition.

## Design Plus

The CW41/CW61P has the *controls in lower front for ease of operation and space savings*. This also places the controls in their own *air-conditioned area* so they are not affected by outside influences. In addition, the CW41/CW61P is *totally thermocoupled* and allows you to replace individual parts as opposed to throwing away the whole system.
