Durable Construction

The CW41P is built with *prime 20-gauge cold-rolled top and sides* with a 14-gauge base. The *interior is made of Armco Type 1, 20-gauge aluminized steel*. The CW41P comes standard with stainless steel front, or optional all stainless steel finish. The stainless steel is made of high quality, 18-gauge 430 stainless; the door interior is 18 gauge stainless.

Energy Efficiency

The CW41P features our *new energy-saving "Power-Pak" 4-cell burner system* and our *unique baffle system*. These make our ovens highly efficient and eliminate hot spots. The *heavily insulated walls*, coupled with our *special vent system*, reduces heat loss and keep your gas dollars from going up the stack. The CW41P is powered by 60,000 highly efficient BTUs which *increase its efficiency and recovery rate*.

Capacity

The CW41P deck size measures 42"x32"x7". Actual cooking capacity depends on the size of the pizza you are cooking. The CW41P will hold six (6) 12" pizzas or four (4) 16" pizzas. Cooking time will vary according to product, but will average between 8-10 minutes.

Space Saver

Because the controls are under the door, the CW41P requires *less installation space* than our competition. This enables you to free up valuable kitchen and/or hood space. The actual width needed is mere 50" for a *42"x32" deck*, almost a foot less than the competition. The CW41P *can convert into a CW42P by stacking*, either initially or after your business grows. This option gives you two 42"x32" decks in only 50" of space.

Design Plus

The CW41P has the *controls in lower front for ease of operation and space savings*. This also places the controls in their own *air-conditioned area* so they are not affected by outside influences. In addition, the CW41P is *totally thermocoupled* and allows you to replace individual parts as opposed to throwing away the whole system.
